

Roberto Patti
Production Manager at ITAP S.p.a.
www.itap.it

We use Sala S.r.l.'s machines to manufacture balls.
Sala S.r.l. is a leading manufacturer of machinery for this kind of product.

We have used other brands in the past, but the high productivity and solutions introduced by Sala S.r.l.'s machines, with their linear layout and compact design, are incomparable.

We very much appreciate the competence and promptness of Sala S.r.l.'s Service.

We have been using their machines since 1974 to obtain the utmost productivity, quality, and efficiency.

We haven't even evaluated other products available on the market since we have chosen to collaborate with Sala S.r.l., as we think that they are always ahead of times.

Sala S.r.l. is a competent and technologically advanced company.
